NOTE FROM ZD:
We are no longer an official mirror for ZSNES as of 6/22/01. So here is the old ZSNES site, frozen in time. Enjoy.

ZSNES is a Super Nintendo emulator programmed by zsKnight and _Demo_. Remember that this is a public beta so don't expect this to run on your machine.

The ZSNES Team is not connected or affiliated with any mentioned company in any way. Companies and all products pertaining to that company are trademarks of that company. Please contact that company for trademark and copyright information.
